

A EEGMMIDB matched ME→MI runs

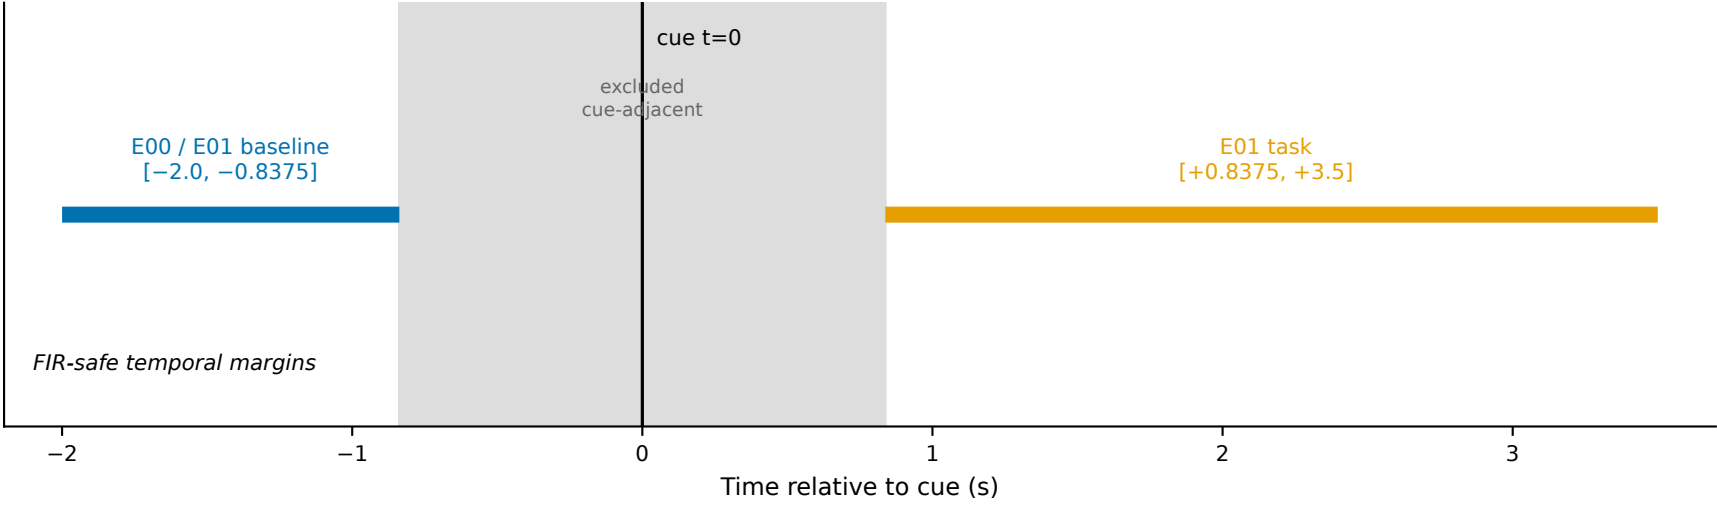

Repetitions 1–3 across matched pairs
*Condition is structurally coupled to run order.
(ME always precedes matched MI; not randomized.)*

B Participant-disjoint nested evaluation

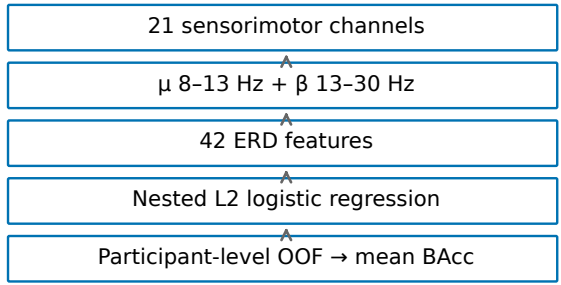

No participant contributes epochs to both outer train and outer test.

C Temporal feature definition

D ERD feature representation

E Analysis / control logic

- Primary E01 (ERD-LR)
 - Pre-cue E00 control
 - Physiology (E03) / movements (E02)
 - Spatial control (E05)
 - Artifact / duration / sampling-rate
 - Run-order diagnostics (E08)
 - Structured permutation (E07)
