

Figure_S10_Duration_Sampling_Participant
Participant-level sensitivity comparisons

Figure_S1_Cohort_Eligibility
Cohort eligibility and sensitivity subsets

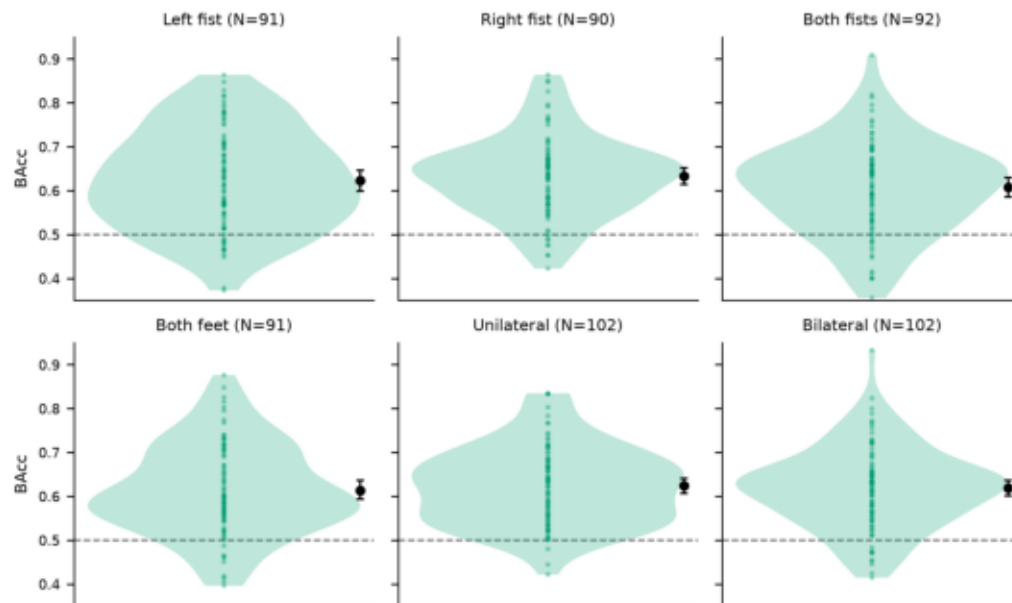

Ineligibility reasons (frozen reason codes):

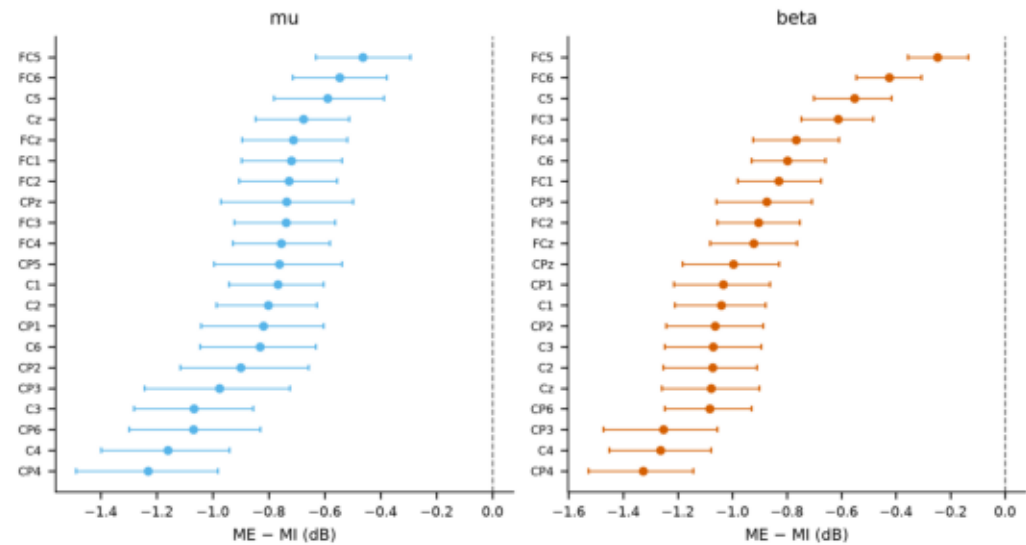

- n=3: Insufficient ME epochs after rejection / Insufficient MI epochs after rejection
- n=1: Insufficient ME epochs after rejection
- n=1: Insufficient matched ME/MI pairs / No usable unilateral matched pair / Insufficient ME epoch...
- n=1: Movement composition incomplete across modes / Insufficient ME epochs after rejection
- n=1: No retained epochs after preprocessing

Counts/reasons from frozen participant_eligibility.csv and sampling-rate summary.

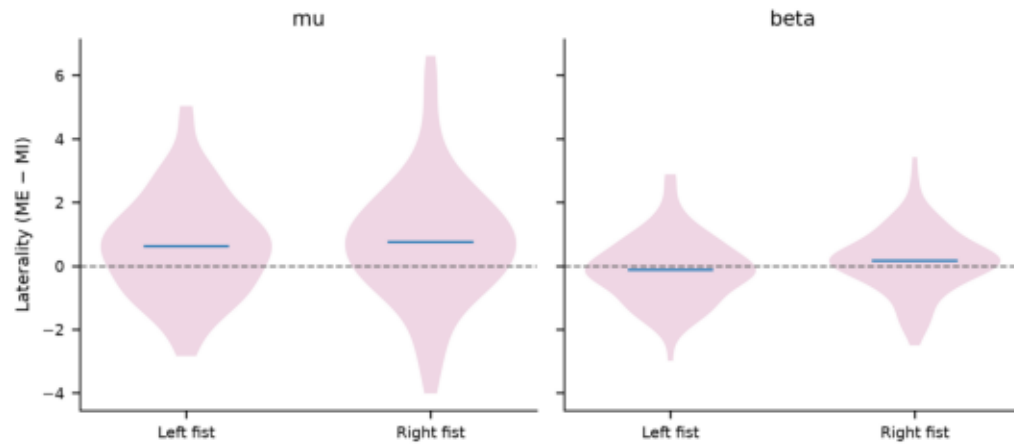

Figure_S2_Movement_Decoding
Movement-specific decoding

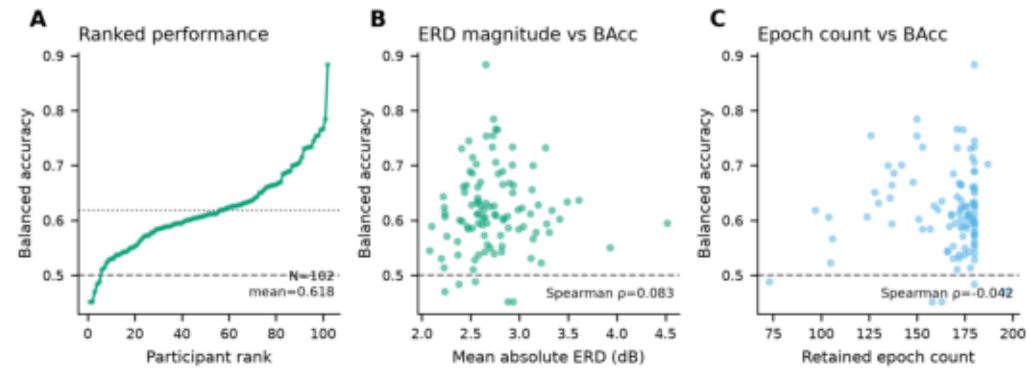

Figure_S3_Channel_ERD
Channel-level ERD

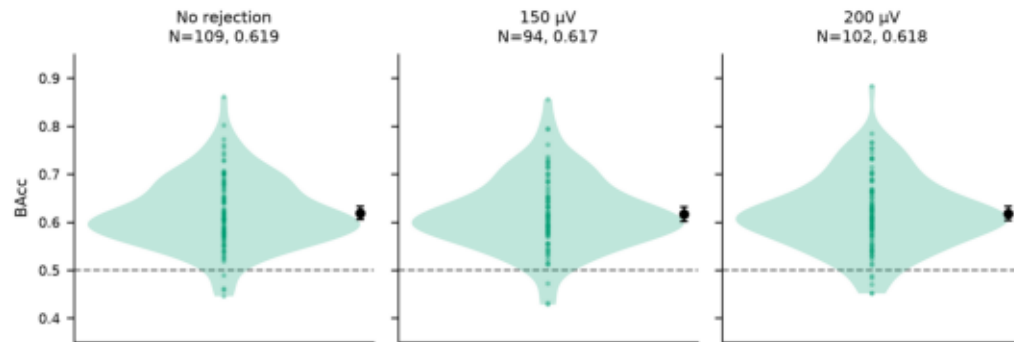

Figure_S4_Laterality
Laterality (secondary)

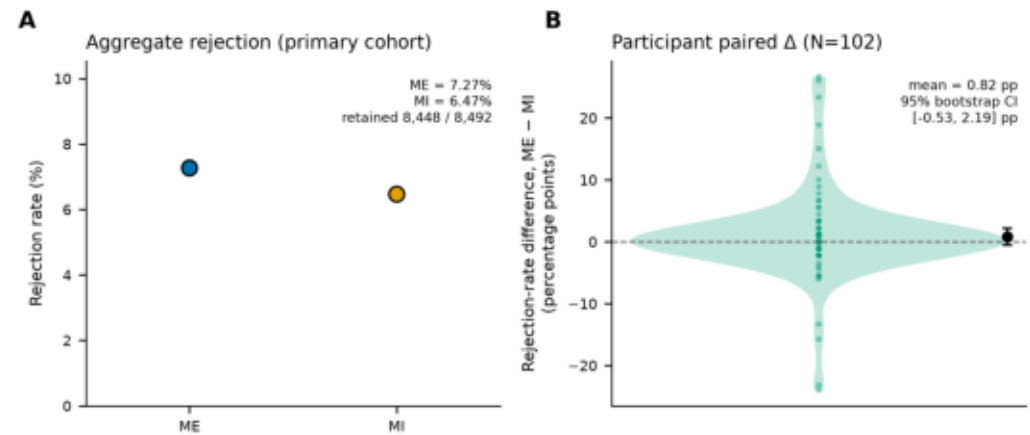

Figure_S5_Participant_Heterogeneity
Participant heterogeneity (exploratory)

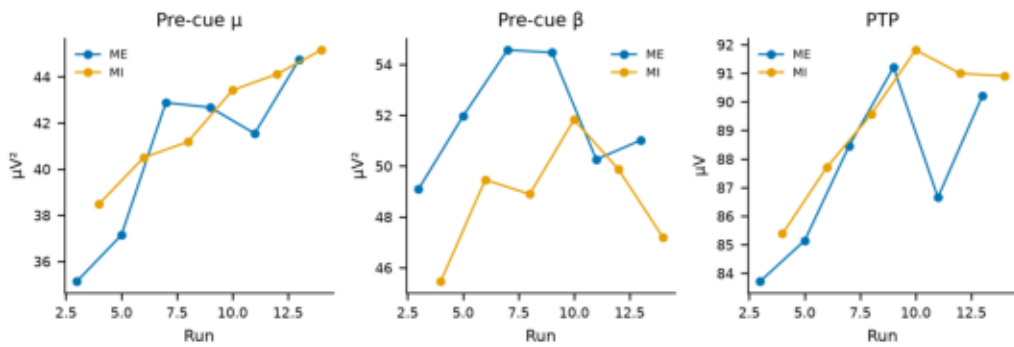

Figure_S6_Artifact_Sensitivity
Artifact-threshold sensitivity

Figure_S7_Rejection_Audit

Figure_S8_E08_Diagnostics
E08 protocol/run-state diagnostics

Figure_S9_Comparator_Distributions
Comparator participant distributions
